

JAMHURIYA UNIVERSITY OF SCIENCE & TECHNOLOGY

Course Title: Principles of Operating System

Class: CA196 & CA197

Scheduling Algorithms Assignment

Deadline: June 01, 2023

Problem 1

<u>Process</u>	<u>Burst Time</u>
P_1	10
P_2	7
P_3	20
P_4	8

Suppose that the processes arrive in the order: P_1 , P_2 , P_3 , P_4 . Draw Gantt chart then calculate waiting time and turnaround time for each process, and average waiting time and average turnaround time using **first come first served algorithm (FCFS)**.

Problem 2

<u>Process</u>	<u>Burst Time</u>
P_1	10
P_2	12
P_3	8
P_4	2

Suppose that the processes arrive in the order: P_1 , P_2 , P_3 . Draw Gantt chart then calculate waiting time and turnaround time for each process, and average waiting time and average turnaround time using **first come first served algorithm (FCFS)**.

Problem 3

<u>Process</u>	<u>Burst Time</u>
P_1	10
P_2	4
P_3	2
P_4	9

Suppose that the processes arrive at the same time. Draw Gantt chart then calculate waiting time and turnaround time for each process, and average waiting time and average turnaround time using **shortest job first (SJF)**.

Problem 4

Given the following processes with their **arrival time** and **burst time**.

<u>Process</u>	<u>Arrival Time</u>	<u>Burst Time</u>
P_1	2	5
P_2	3	10
P_3	5	7
P_4	7	8
P_5	8	3

Draw Gantt chart then calculate waiting time and turnaround time for each process, and average waiting time and average turnaround time using **shortest job first (SJF)**.

Problem 5

<u>Process</u>	<u>Burst Time</u>	<u>Priority</u>
P_1	5	5
P_2	10	3
P_3	6	1
P_4	2	4
P_5	3	2

Suppose that the processes arrive at the same time. Draw Gantt chart then calculate waiting time and turnaround time for each process, and average waiting time and average turnaround time using **priority scheduling algorithms**.

Problem 6

<u>Process</u>	<u>Burst Time</u>	<u>Priority</u>
P_1	4	2
P_2	3	4
P_3	5	3
P_4	10	1

Suppose that the processes arrive at the same time. Draw Gantt chart then calculate waiting time and turnaround time for each process and average waiting time and average turnaround time using **priority scheduling algorithms**.

Problem 7

<u>Process</u>	<u>Burst Time</u>
P_1	11
P_2	<u>18</u> -
P_3	8

Suppose that the processes arrive at the same time. Draw Gantt chart then calculate waiting time and turnaround time for each process, and average waiting time and average turnaround time using **round robin algorithm (RR)** with time quantum = 5 milliseconds.

Problem 8

<u>Process</u>	<u>Burst Time</u>
P_1	10
P_2	15
P_3	6
P_4	25

Suppose that the processes arrive at the same time. Draw Gantt chart then calculate waiting time and turnaround time for each process, and average waiting time and average turnaround time using **round robin algorithm (RR)** with time quantum = 7 milliseconds.

END
